

Bucks Fabricating COVID-19 Response
March 26, 2020

Valued Customers, Vendors, Partners and Friends,

Buck Fabricating is a PRIMARY METAL MANUFACTURER (Industry Group – Steel Product Manufacturing from Purchased Steel) and will re-open operations on a scaled down basis, March 30, 2020.

Starting on March 18th, Bucks Fabricating immediately implemented CDC guidelines for ALL employees. This includes social distancing by staggering lunch breaks and start times and limiting meeting sizes, as well as providing anti-bacterial and sanitizing products. We have enhanced all nightly cleaning activities and have implemented remote work for our office employees. Our team is available to service and deliver on all of customer order requirements on our normal Industry leading lead-time basis.

We are committed to keep your business in motion.

- Our dedicated manufacturing team is diligently working to fulfill orders as scheduled.
- We currently have over (200) roll-off containers and Trash Boxes in stock to support immediate needs for standard products.
- Sales and customer support will continue to operate remotely and can be reached via direct phone lines and email. This not only maintains our high level of customer service but ensures the health and safety of our team members.
- Shipments are being fulfilled as scheduled. Our team will be in communication if any shipping changes need made to accommodate the current situation.

As the situation continues to develop and more information becomes available to us, we will continue to provide updates.
